**Summary** — Experienced Oracle Cloud Technical Lead with 9 years of expertise in gathering requirements, designing, developing, implementing, testing, and maintaining applications using Oracle Fusion, OIC, VBCS, and ADF. Specializes in ETL processes and data migration with a proven track record of delivering complex projects, leading high-performing teams, and fostering innovation.

## Skills

**Technologies** Fusion, OIC, VBCS, ADF  
**Modules** HCM, SCM, FIN

**Environments** SQL Developer, JDeveloper, Git, SVN  
**Languages** SQL, PL/SQL, HTML, CSS, Java

## Experience

### Version 1

Apr 2021 – Present

Oracle Cloud Technical Lead

Client: Citco

- Analyzed network traffic patterns to identify bottlenecks and optimize performance
- Implemented firewall rules to enhance network security and prevent unauthorized access
- Conducted regular vulnerability assessments and applied patches to secure systems
- Collaborated with cross-functional teams to streamline IT processes and improve efficiency

Client: Irish Rail

- Configured monitoring tools to track system performance and troubleshoot issues proactively
- Automated routine tasks using scripts to reduce manual effort and increase productivity
- Documented system configurations and procedures for knowledge sharing within the team
- Participated in disaster recovery planning and drills to ensure business continuity in case of emergencies

Client: Broken Galleries

- Implemented cloud migration strategies to move applications to a hybrid environment
- Optimized database performance through indexing and query tuning techniques
- Conducted capacity planning and scalability assessments to support future growth
- Provided on-call support for critical issues and worked on root cause analysis for incident resolution

### HealthCo Industries

Feb 2011 – Mar 2016

Senior Systems Administrator (SRE)

- Managed virtualized server environment spanning multiple data centers
- Oversaw migration of critical business applications to cloud-based platforms
- Configured and monitored network security measures, including firewalls and intrusion detection systems
- Implemented multi-factor authentication for remote access to company systems
- Streamlined patch management process, reducing vulnerabilities and downtime
- Conducted regular vulnerability assessments and penetration testing
- Automated server provisioning and configuration management tasks
- Maintained documentation for IT policies and procedures
- Coordinated responses to cybersecurity incidents with internal teams and external vendors
